

FORMULA SAE®/ELECTRIC & FORMULA HYBRID WORKSHOP

This workshop is designed to complement the Fall Workshop, and help Formula SAE® and Formula Hybrid teams with their vehicle development and with the events at the competitions. Formula Hybrid and FSAE® Electric teams are especially encouraged to bring their vehicles, and the paperwork that is required for Technical Inspection, as these cars will be used in an afternoon break-out session on *Getting Through Electrical Technical Inspection*. Other teams are also encouraged to bring vehicles to discuss challenges and share ideas.

Who Should Attend?

SAE Student Chapter members — targeting students from freshman through junior classes to assist future projects.

What Will Be Covered?

- Competition Overview
- Design, Cost & Presentation Events
- Getting through Mechanical & Electrical Technical Inspections
- Test Planning & Data Acquisition
- Engine Calibration
