

Student Engineer Day

Tuesday, March 7, 2017
Various Companies

Students and Engineers Wanted!

SAE Detroit Section's annual Student Engineer Day gives students the opportunity to spend a day on the job with a practicing engineer in the student's field of choice. This event provides the student with insight into the engineering field and provides companies with the insight into potential engineering talent. This event is "broad in scope" yet allows for individualization by placing students with engineers who have similar career interests.

Students and engineers are encouraged to attend the SAE Detroit Section Chevrolet Bolt EV Vehicle Event at the San Marino Club in Troy that evening from 5:30-8:30 p.m. The program will be presented by lead GM engineers involved in the production and will include dinner as well as a networking/social hour.

Visit the student section at www.sae-detroit.org for registration form.

For questions, email Roxanne Loeffler at roxanne.loeffler@sae-detroit.org or call (248) 324-4445 ext. 3.
