6400 Center Drive
Sterling Heights, MI 48314

Cost:

\$25 SAE Member/Guest

(Cost is per person. Event is open to SAE members and their guests. Members must provide member number. Pre-registration is required).

GM HERITAGE CENTER TOUR

Thinking of a team building holiday activity. Maybe you would like to meet up with a customer before the holiday rush or would just like to spend some time around a cool car collection. Back by popular demand as requested by our members, SAE Detroit Section has arranged this exclusive afternoon tour, which normally is only open to GM employees, analysts, and the media.

The GM Heritage Center is not just a museum, but a cross between the ultimate automotive enthusiast's garage and a living repository of automotive history. This is a great opportunity for SAE members to invite a young professional, take advantage of the landscape, and experience the history.

More than 165 vehicles exhibits and historical memorabilia representing 10 decades are represented. The vehicle collection showcases a wide range of GM design, technology, and innovation. Guests will have the opportunity to see past and current concept vehicles, muscle cars, as well as historically significant vehicles from various eras. The Center is always changing with vehicle exhibits being constantly freshened.

By highlighting the exciting designs, groundbreaking technology, and powerful brands that have comprised GM's first century, the GM Heritage Center will help inspire new generations of enthusiasts and make the company even stronger in years to come as GM moves toward a second century of operations. This is evident by great designs, both legendary and recent, like the sixth generation Corvette, Cadillac 16 Concept Vehicle, and the Pontiac Solstice.
