STUDENT ENGINEER DAY

Students and Engineers Wanted

Sign up today! SAE Detroit Section's annual Student Engineer Day gives students the opportunity to spend a day on the job with a practicing engineer in the student's field of choice. This event provides the student with insight into the engineering field and provides companies with the potential engineering talent. This event is "broad in scope" yet allows for individualization by placing students with engineers who have similar career interests.

Students and engineers are encouraged to attend the SAE Detroit Section New Nissan LEAF Vehicle Event that evening at Burton Manor in Livonia on from 5:30-8:30 p.m. The program will be presented by the Nissan team involved in the production and will include dinner as well as a networking social hour.

Registration forms due Wednesday, February 14, 2018.

To register, visit www.sae-detroit.org
