

Thursday, February 28, 2019

5:00 - 7:00 p.m.

**Materials Sciences
Corporation and Brüel Kjør**

6855 Commerce Blvd.
Canton, MI

Important Note: Registration will close
February 25. No onsite registration or refunds
after February 21.

EXPLORING NOISE AND VIBRATION TECHNOLOGY TOUR

As we prepare for the next generation of vehicles, take this opportunity to explore the hidden art of vehicle Noise, Vibration, and Harshness (NVH). Explore the tools and technologies that are used to shape the sounds and feels we have come to expect in vehicles today and how we can drive the sounds of tomorrow.

The state of the art NVH facility will be on full display offering attendees the opportunity to interact directly with the tools and facility that help make vehicles sound the way they do.

This self-guided tour will take you through semi-anechoic testing chambers, full anechoic chamber, structural testing suite, and an environmental controlled four wheel drive chassis dynamometer. Each room will be equipped with the most recent acquisition technology and equipment guests can interact with.

Agenda

5:00 - 6:00 p.m. Social Hour (cocktails and light hors d'oeuvres)

5:00 - 7:00 p.m. Strolling tour of facility and interactive tools

Important Note: Tour is limited to SAE members and their guests. Registration will close February 25. No onsite registration or refunds after February 21.

Social Hour Sponsored by:
