

Maura Chmielowiec

Design Release Engineer for High Voltage Hardware and Electric Vehicle Supply Equipment
General Motors

Maura Chmielowiec was born and raised in Batavia, NY. She received her Bachelors in Mechanical Engineering from the Rochester Institute of Technology in 2016 and is currently pursuing a Masters of Engineering in Systems Engineering from Purdue University.

While Maura was pursuing her Bachelors Degree, she founded and was the Chief Engineer of an All-Female Formula SAE Electric Team called, RIT Hot Wheelz. Her involvement with Formula SAE helped her to obtain co-op opportunities with General Electric (GE) Aviation and General Motors.

Maura began her full-time career with General Motors and has held various roles within the company. Currently, she designs and releases components for future electric vehicles.

She has served on the SAE Detroit Section Board since 2018.
