

**Roman Oberli**  
**COO**  
**Axon Vibe**

Chief to Axon Vibe, a location-based contextual platform that detects and predicts real-world human behavior. Roman leads a team of more than 100 engineers and data scientists from multiple disciplines, located at five centers around the globe – every day working hard on the future of mobility.

As the leader of Axon Vibe product vision and development process, Roman is quickly growing his reputation from being a thought leader in spatial analysis to being a true visionary in applying location data for the benefit of passengers and all stakeholders in the mobility sector.

As a serial entrepreneur by nature Roman has extensive experience in startup ventures. He is also a dedicated father of two.
