

**Stephen Lesh Bio**  
**Head of Hardware Engineering and Vehicle Programs**  
**Uber ATG**

The Uber Advanced Technologies Group (ATG) is dedicated to developing self-driving, mapping, and vehicle safety technologies that advance Uber's mission of bringing safe, reliable transportation to everyone, everywhere.

As Head of Hardware Engineering and Vehicle Programs, Stephen leads the team designing and developing Uber's Self-Driving-Vehicle hardware systems, including integration of the technology into OEM-partner vehicle platforms. He is also involved in the development of future business models for mobility with various partners to design, build, and operate autonomous fleets.

Prior to joining Uber, Stephen worked for over 20 years at Ford Motor Co. in a variety of vehicle program and engineering development roles in both the U.S. and Europe, most recently as Global Director, Program Management.
